

HAMPTON MEDICAL WEIGHT LOSS PROGRAM

1st Month in Program: The first month of the program is designed to determine if the patient can tolerate the medicines that aid in weight loss. If you are able to tolerate the medicines then we encourage you to sign up for quarterly billing. The quarterly billing rate (every three months) allows us to offer a discount. If we can save money while ordering meds in bulk then we want to pass on those savings.

- **1st Month Fee: 350\$**

- As stated above, the 1st month is designed to ensure the Patient can tolerate the meds.

- **Quarterly Fee after 1st Month: 900\$ per quarter (every 3 months)**

- A 2% CC processing fee will be applied to all quarterly payments. The above fees include a monthly visit at the office with either Dr Hampton or his nurse. In addition, a personalized diet and exercise plan to meet your goals.

COST EFFECTIVE (OPTIONAL) PLAN AVAILABLE AFTER MONTH 6 IN PROGRAM

Interested in continuing our program but want to spend less?

We are offering a "½ plan" to those interested in continuing the program for a discounted price of **\$150 per month**. This plan includes the once daily pill (phentermine and topiramate) provided as a continuation of the program, and excludes the semaglutide (once weekly) shot. This can help patients continue to lose weight while not breaking the bank. **AVAILABLE ONLY AFTER 6 MONTHS IN THE PROGRAM!**

The patient can cancel at any time and no further fees will be assessed. Any fees collected are non-refundable. This is because the majority of the costs of this program derive from medication costs.

WE DO NOT ACCEPT ANY INSURANCE IN THIS PROGRAM. We cannot get these medications approved with insurance because they do not want to pay for the cost. Please contact the office for further information.
